01

Touchscreen Games

Overview

A plug-and-play collection of hypercasual games designed for fast engagement and high participation. Built for touch-screens of any size or orientation, these games are optimized for quick play cycles, allowing users to jump in, play, and move on seamlessly.

Flexible Integration

Can operate as a standalone unit or be embedded within larger activation builds.

On-Ground Facilitation

Optional trained staff to guide gameplay and enhance user experience.

Engagement Tracking

QR-based web app with OTP login to track participation, capture data, and manage prize distribution.

Branded Screen Casing

Available in foamboard or wood, fully wrapped in branded vinyl finishes.

Branded Game Software

Adapt visuals to your brand with custom logos, colors, fonts, and UI elements.

Flip & Match

Timed card-matching challenge where players flip tiles to find identical pairs before the timer runs out. Difficulty scales with grid size and time pressure.

SKU ID	TG-001
Category	Touch Screen Games: Skill Challenge
Interaction duration	30-60 seconds
Daily interactions	200-400 participants per day
Delivery lead time	4-5 working days (Qatar)
Base package	55" touchscreen display Custom-branded game software Custom-branded screen casing
Available upgrades	Game usher with custom tshirt Gameplay modifications Data analytics integration

Perfect Timing

A reflex timing game where players must tap the screen at the exact moment a moving indicator reaches the target zone. Precision determines the score.

SKU ID	TG-003
Category	Touch Screen Games: Skill Challenge
Interaction duration	30-60 seconds
Daily interactions	200-400 participants per day
Delivery lead time	4-5 working days (Qatar)
Base package	55" touchscreen display
	Custom-branded game software
	Custom-branded screen casing
Available upgrades	Game usher with custom tshirt
	Gameplay modifications
	Data analytics integration

Tile Puzzle

Rearrange scrambled tiles by sliding them into empty spaces to reconstruct the correct image before the timer expires.

SKU ID	TG-005
Category	Touch Screen Games: Skill Challenge
Interaction duration	30-60 seconds
Daily interactions	200-400 participants per day
Delivery lead time	4-5 working days (Qatar)
Base package	55" touchscreen display Custom-branded game software Custom-branded screen casing
Available upgrades	Game usher with custom tshirt Gameplay modifications Data analytics integration

02

Analog Retro Games

Overview

A collection of modular, pre-fabricated machines inspired by classic arcade experiences. Designed to bring back the charm of retro games, these installations combine tactile interaction with high-visibility engagement, making them ideal for prize-driven activations and nostalgic brand moments.

Modular Game Structures
Pre-built units designed to adapt seamlessly to different activation environments.

On-Ground Facilitation
Optional trained staff to manage gameplay, guide participants, and maintain flow.

Custom Branding Options
Finished with paint or vinyl wraps to match your brand identity and visual language.

Data & Engagement Tracking
Capture participation data and integrate tracking mechanisms for campaigns and prize distribution.

Retro-Inspired Appeal
Designed to evoke familiar arcade experiences with a modern, brand-ready execution.

Prize Wheel Classic

Participants spin a large prize wheel to randomly determine rewards, outcomes, or promotional offers.

SKU ID	AR-005
Category	Analog Retro: Chance Mechanic
Interaction duration	15-25 seconds
Daily interactions	400-500 participants per day
Delivery lead time	4-5 working days (Qatar)
Base package	Custom-branded spin-wheel
Available upgrades	Game usher with custom tshirt
	Data analytics integration

Wind Chamber

Players attempt to catch floating foam balls to capture prizes from a transparent chamber.

SKU ID	AR-009
Category	Analog Retro: Skill Challenge
Interaction duration	15-25 seconds
Daily interactions	400-500 participants per day
Delivery lead time	4-5 working days (Qatar)
Base package	Custom-branded wind chamber Color foam balls (3 colors)
Available upgrades	Branded vouchers (3-designs) Booth facilitator with custom tshirt Data analytics integration

Prize Wheel Barrel

Participants spin a large prize wheel to randomly determine rewards, outcomes, or promotional offers.

SKU ID	AR-010
Category	Analog Retro: Chance Mechanic
Interaction duration	15-25 seconds
Daily interactions	400-500 participants per day
Delivery lead time	4-5 working days (Qatar)
Base package	Custom-branded wheel barrel
Available upgrades	Game usher with custom tshirt
	Data analytics integration

Stop The Clock

An analog challenge where players try to stop the clock at exactly 10 seconds.

SKU ID	AR-011
Category	Analog Retro: Skill Challenge
Interaction duration	15-25 seconds
Daily interactions	400-500 participants per day
Delivery lead time	4-5 working days (Qatar)
Base package	Custom-branded game popup
Available upgrades	Game usher with custom tshirt
	Data analytics integration

Maze Wheel

A hands-on skill challenge where players rotate a control wheel to navigate a ball through a physical maze, testing precision, coordination, and control.

SKU ID	AR-002
Category	Analog Retro: Skill Challenge
Interaction duration	50-60 seconds
Daily interactions	200-400 participants per day
Delivery lead time	7 working days (Qatar)
Base package	Custom-branded maze with platform
Available upgrades	Game usher with custom tshirt
	Data analytics integration

Plinko

A drop-and-win experience where a token bounces unpredictably through pegs into reward slots. Commonly used for prize distribution.

SKU ID	AR-001
Category	Analog Retro: Skill Challenge
Interaction duration	15-25 seconds
Daily interactions	400-500 participants per day
Delivery lead time	7 working days (Qatar)
Base package	Custom-branded plinko set
Available upgrades	Game usher with custom tshirt
	Data analytics integration

03

Phygital Games

Overview

Where physical movement meets digital gameplay. Powered by motion tracking, sensors, and real-time feedback, these experiences turn the body into the controller, creating immersive, high-energy interactions that blur the line between physical and digital play.

Custom Branding Options

Finished with paint or vinyl wraps to align with your brand identity and visual language.

On-Ground Facilitation

Optional trained staff to manage gameplay, guide participants, and maintain flow.

Sensor & Motion Technology

Powered by cameras, sensors, and connected hardware to track actions in real time.

Modular Game Units

Pre-built systems designed to adapt seamlessly to different activation environments.

Body-Driven Interaction

Gameplay controlled through real-world movement, encouraging active participation.

Tap Rush

Motion-tracking gameplay where players rapidly strike or tap virtual targets appearing on screen using body movement.

SKU ID	PY-001
Category	Phygital Games: Skill Challenge
Interaction duration	50-60 seconds
Daily interactions	200-400 participants per day
Delivery lead time	5 working days (Qatar)
Base package	55" touchscreen display Custom-branded game software Custom-branded screen casing Booth facilitator with custom tshirt
Available upgrades	Game mechanics modifications Data analytics integration

Frame Dodge

Players dodge virtual laser frames entering the screen by moving their bodies left, right, or jumping away.

SKU ID	PY-005
Category	Phygital Games: Skill Challenge
Interaction duration	50-60 seconds
Daily interactions	200-400 participants per day
Delivery lead time	5 working days (Qatar)
Base package	55" touchscreen display Custom-branded game software Custom-branded screen casing Booth facilitator with custom tshirt
Available upgrades	Game mechanics modifications Data analytics integration

Fast Pass

Precision-based football gameplay where players stand inside a circular sensor ring and pass a ball toward illuminated targets, with real-time tracking to score accuracy and speed.

SKU ID	PY-008
Category	Phygital Games: Skill Challenge
Interaction duration	3–5 minutes
Daily interactions	80–120 participants per day
Delivery lead time	8 working days (Qatar)
Base package	Sensor ring with target system
	Real-time scoring game software
	Custom-branded structure
	Custom-branded software
	Booth facilitator with custom tshirt
Available upgrades	Game mechanics modifications
	Leaderboard system integration
	Data analytics integration

Whack-a-Mole

Fast-reaction gameplay where players strike emerging targets on screen using body movement, with motion tracking detecting hits and misses in real time.

SKU ID	PY-009
Category	Phygital Games: Skill Challenge
Interaction duration	50-60 seconds
Daily interactions	200-400 participants per day
Delivery lead time	5 working days (Qatar)
Base package	55" touchscreen display
	Custom-branded game software
	Custom-branded screen casing
	Booth facilitator with custom tshirt
Available upgrades	Game mechanics modifications
	Data analytics integration

Blob Runner

A motion-controlled quirky running game where players use body movement to navigate a character through obstacles, testing coordination, timing, and agility.

SKU ID	PY-010
Category	Phygital Games: Skill Challenge
Interaction duration	50-60 seconds
Daily interactions	200-400 participants per day
Delivery lead time	12 working days (Qatar)
Base package	55" touchscreen display Custom-branded game software Custom-branded screen casing Booth facilitator with custom tshirt
Available upgrades	Game mechanics modifications Data analytics integration

04

DIY Station

Overview

A hands-on category focused on creation, personalization, and take-home experiences. These stations invite participants to design, assemble, or customize their own items, turning engagement into something tangible and memorable with strong personal value.

High Personalization Value

Participants create unique, customized items that reflect their style or the brand experience.

Turnkey Solution

Delivered as complete package with all required equipment, materials & knowhows

On-Ground Facilitation

Trained staff manage the station, guide participants, and maintain smooth flow.

Tangible Takeaways

Designed around keepsakes that extend the brand interaction beyond the activation.

Modular Setup

Pre-built units that adapt seamlessly to different activation environments.

Lace Charm & Engraving

Guests customize lace charms or accessories using engraving or decorative elements to create personalized keepsakes.

SKU ID	DS-001
Category	DIY Station: Creative Personalization
Interaction duration	3-5 minutes
Daily interactions	80-120 participants per day
Delivery lead time	9-10 working days (Qatar)
Base package	Custom-branded booth
	Charm materials & equipment
	Booth facilitator with custom tshirt
Available upgrades	Custom-branded charms
	Data analytics integration

Bracelet Charm

Participants assemble or decorate bracelet charms using modular components and design elements.

SKU ID	DS-004
Category	DIY Station: Creative Personalization
Interaction duration	3-5 minutes
Daily interactions	80-120 participants per day
Delivery lead time	9-10 working days (Qatar)
Base package	Custom-branded booth
	Charm materials & equipment
	Booth facilitator with custom tshirt
Available upgrades	Custom-branded charms
	Data analytics integration

05

Activation Utility

Overview

A suite of supporting tools and systems designed to enhance, manage, and amplify activation experiences. These utilities complement core interactions by enabling participation tracking, content capture, and real-time engagement, ensuring smoother operations and measurable outcomes.

Content Capture & Output

Photo, video, and AI-powered outputs designed for instant sharing or printing.

Custom Branding Options

Interfaces and physical setups can be aligned to your brand identity.

Turnkey Deployment

Delivered as complete systems with all required hardware and technology.

Participation Management

Systems for registration, check-ins, and structured user journeys.

Data & Engagement Tracking

Capture user data, monitor interactions, and measure performance in real time.

AI Photobooth

AI transforms participant photos into stylized or themed visuals instantly, delivered digitally or via print.

SKU ID	SU-001
Category	Utility: Creative Personalization
Interaction duration	2-3 minutes
Daily interactions	120-150 participants per day
Delivery lead time	5-6 working days (Qatar)
Base package	Custom-branded AI photo booth
	Custom-branded software
	Booth facilitator with custom tshirt
Available upgrades	Instant print station & materials
	Data analytics integration

Mirror Photobooth

A camera-based photo booth where participants see themselves in a mirrored screen interface before capturing photos that can be downloaded via QR or printed instantly.

SKU ID	SU-004
Category	Utility: Creative Personalization
Interaction duration	2-3 minutes
Daily interactions	120-150 participants per day
Delivery lead time	5-6 working days (Qatar)
Base package	Custom-branded mirror photo booth Custom-branded software Booth facilitator with custom tshirt
Available upgrades	Instant print station & materials Data analytics integration

06

Immersive Tech

Overview

Technology-driven experiences designed to transform spaces into interactive digital environments. From AR to large-scale interactive walls, these installations combine advanced tech with intuitive interaction creating visually striking and highly engaging brand moments.

Highly Customizable Content
Flexible content design tailored to brand storytelling and campaign objectives.

Turnkey Deployment
Delivered as complete systems with all required hardware and technology.

Immersive Environments
Transform walls and spaces into dynamic, interactive visual experiences.

Advanced Technology Stack
Powered by AR, projection systems, sensors, and real-time processing.

Brand Customization

Every interaction.
Customizable to your brand.

Each interaction is sold with a pre-built templates that allows for efficient deployment while still offering meaningful brand integration.

Customization is applied across key touchpoints — ensuring your brand is clearly represented without compromising speed, reliability, or setup efficiency.

Pre-built structures.
Branded to your identity.

Standard systems.
Branded content.

For fully bespoke builds, custom structures, or new gameplay development, dedicated solutions can be explored separately.

Physical Branding

All installations use pre-fabricated structures with defined formats allowing for fast deployment and consistency. Branding is applied through vinyl wraps, graphic applications, and paint finishes, transforming each unit to align with your visual identity.

Digital & Content

Game interfaces, UI elements, and on-screen content can be fully adapted using your brand assets — including logos, colors, typography, and campaign visuals. While core mechanics remain consistent, the overall experience is tailored to reflect your brand and messaging.

About Us

Designing interactive
experiences at scale.

Adventure Castle is a design-led activation partner focused on creating interactive experiences that deliver measurable impact. Our approach combines modular systems, thoughtful design, and real-world execution, enabling brands to deploy high-impact activations that are not only engaging, but also efficient, scalable, and performance-driven.

Every solution is built with a clear focus on participation, user flow, and ROI,

balancing creativity with systems that are proven to perform in real environments.

Our work has been delivered across leading brands in Qatar, including Talabat, Keeta, QSTP, and PayLater — spanning mall activations, public events, and branded experiences. From concept to on-ground execution, our team manages the full lifecycle, ensuring every activation is delivered with precision and measurable results.
